

Listing of the Claims:

1. (Currently Amended) A method of providing for the verified testing of a student by a test provider at a testing facility remote from said test provider utilizing a predetermined interactive web site of said test provider adapted to transmit directly from the test provider to the student test questions and to transmit directly from the student to said test provider answers to the test questions, said method comprising:

providing said student with a recognizable student identification indicia;

providing the testing facility with a recognizable verification indicia indicative of verification by the testing facility of the identification of said student;

accessing on ~~the internet~~ said predetermined interactive web site for said test provider through a terminal at said testing facility ~~a predetermined interactive web site for said test provider~~;

transmitting to said predetermined interactive web site of said test provider through said terminal at said testing facility of both the student identification indicia and said verification indicia to enable access by said student to said test questions on said interactive web site; and

~~providing~~ transmitting by said test provider directly to said student on said predetermined interactive web site of said test provider said test questions ~~a test~~ for the student and ~~receiving~~ transmitting by said student directly back to said test

provider on said predetermined interactive web site answers to that said test questions  
from the student,

whereby ~~the~~ said test provider may test ~~the~~ said student at said remote testing  
facility and be assured of the proper identification of the student being tested.

2. (Original) The method of claim 1 wherein the student identification indicia is transmitted to said predetermined interactive web site through said terminal at said testing facility prior to the transmission of said verification indicia by said testing facility.
3. (Original) The method of claim 1 wherein said verification indicia is a password provided to the testing facility to be entered by the testing facility after it has verified the identity of the student taking the test.
4. (Original) The method of claim 3 wherein said password system is periodically changed by said test provider to maintain the integrity of the system.
5. (Original) The method of claim 4 wherein said password is a combination of codes to further maintain the integrity of the system and prevent dissemination of the password to unauthorized persons.
6. (New) A method of testing persons required by traffic court to receive traffic school training and pass a test by a court-authorized test provider which testing may be performed at any testing facility capable of verifying the identity of the person and having a computer and of transmitting directly communication between the test

provider said person being tested, so that test questions may be transmitted directly to said person and the answers to said test questions may be transmitted by said person directly to said test provider without requiring any participation by the testing facility in addition to providing the computer and verifying the identity of the person taking the test, said method comprising:

providing said person being tested with a recognizable personal identification indicia;

providing the testing facility with a recognizable verification indicia indicative of verification by the testing facility of the identification of said person being tested;

accessing on said predetermined interactive web site for said test provider through a terminal at said testing facility;

transmitting to said predetermined interactive web site of said test provider through said terminal at said testing facility of both the personal identification indicia of the person being tested and said verification indicia of said testing facility to enable access by said person to said test questions on said interactive web site; and

transmitting test questions from said test provider directly to said person being tested on said predetermined interactive web site; and

transmitting answers to said test questions from said person being tested directly to said test provider on said predetermined interactive web,

whereby said test provider may test said person at said remote testing facility and be assured of the proper identification of the person being tested without requiring any further participation by the testing facility.
